

# **Langley Mill Church of England Infant School and Nursery**

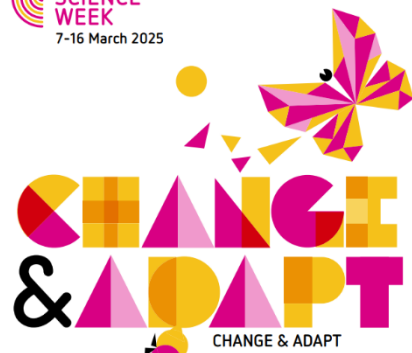

## **Science Newsletter**

We pursue a broad and balanced Science curriculum that incorporates practical and outdoor experiences and promotes academic success, personal reflection, growth and the development of a social conscience. We emphasise independent thought to enable all our pupils to become reflective, articulate, and independent thinkers and lay foundations for future learning.

**This year across school we have increased our emphasis on working scientifically and have allowed the children to undertake more scientific experiments. This has allowed them opportunity to find their own answers to many questions posed and helps to cement their learning.**

Every year in school we take part in British Science Week. The theme for this school year is 'Change and Adapt'. All children will take part in activities linked to this theme during the week 7-16<sup>th</sup> March.
